This chat doesn't have an explicit name assigned in the provided context, but based on the documents and our discussion, it revolves around the **ID Career Sorter App** (also referred to as the AI-Powered Industrial Design Career Explorer in the UC Bearcat AI Grants Proposal). If you're asking about a specific chat session or platform, could you clarify? For now, I'd call this conversation "ID Career Sorter App Budget Planning."

Feedback Questions

1. Are you referring to a specific chat session or platform name, or should we name this discussion for clarity?

2. Do you want to adjust any part of the technology or evaluation budget based on this context?

3. Is there a specific aspect of the app's development you'd like to explore next?
